Welcome to NUtimes!

NUtec Digital Ink's regular e-newsletter for print professionals and colour enthusiasts

In this issue:

- NUtec and its distributors exhibit at Fespa Africa expo co-located with Sign Africa.
- Let's celebrate! International Print Day (#IPD18) on 17 October 2018.
- Meet our TecTravellers
- NUtec develops Ultra-High Chroma (UHC) dye sublimation ink
- Spotted: NUtec inks in...

NUtec and its distributors exhibit at Fespa Africa expo, co-located with Sign Africa.

NUtec along with its two major South African distributors, Falcon and Kolok, participated at the FESPA Africa/SignAfrica exhibition from 12-14 September 2018 at the Gallagher Convention Centre, Midrand, Gauteng, South Africa.

Falcon showcased the latest [NUbis](#) bulk ink delivery system from NUtec while Kolok launched their Stingray bundle comprising of printer, media and ink using dye sublimation and eco-solvent NUtec inks.

These two innovative companies knew how to draw crowds to their stands: Falcon had visitors spin a colour wheel for prizes while Kolok met with guests in a "NUtec printed" living room!

Let's celebrate! International Print Day (IPD) is on 17 October 2018.

Now in its fifth year, IPD18 encourages all print industry professionals to take to social media to share your knowledge, showcase your work and form new relationships using the hashtag #IPD18.

This year's theme is COLLABORATION! We are all in this together and when we work together, share ideas and create projects and products together, we are all better for it – and so are the projects and products.

#PrintWith is the hashtag to be used when supporting IPD's collaborative theme, and always include #IPD18 in all shares for International Print Day. Let's make PRINT trend!

Meet our TecTravellers

and discover what they have been up to around the globe

Pictured left to right:

Robbie Petersen: Visited Brazil to do 7 conversions which included our AQ10-DST-SC dye sub ink on Mutoh 1638, Roland TexArt and Epson Surecolour machines; as well as our A20-RIG UV-curable inks on Prismajet and CET Color printers.

Paul Geldenhuys: As Technical Director of NUtec, Paul travels the globe for research and development as well as training purposes with his most recent visit being in Brazil.

Jason Arendse: Visited the USA for colour management training at NUtec USA and also travelled across the country for multiple conversions including a Mimaki JV33 with our E12-MS21 ERP ink, a Mimaki JFX with our A20-RIG-MI UV ink, a TurboJet with our Q50-RTR UV ink and an Océ flatbed now using our A50-RIG UV ink.

Warwick Davison: Visited Mexico and master distributor Grupo Zur to convert an EFI Vutek QS printer to our NUsolutions UV-curable A50-HYB-EF as well as converting an EFI Vutek QSr printer to our A50-RTR-EF UV ink. Hands-on conversion training was also conducted at Grupo Zur premises.

Lorenzo Wildschut: Visited China to convert 2 locally made printers to our latest A50-HYB and A50-RTR UV-curable inks, followed by a visit to the Philippines for technical training and support.

NUtec develops Ultra-High Chroma (UHC) dye sublimation ink

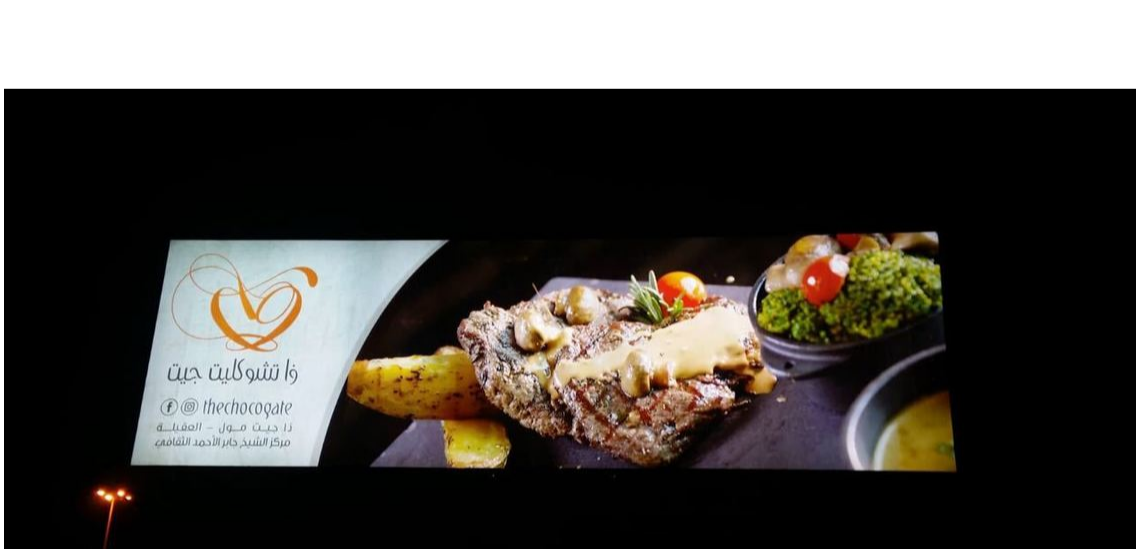

The Aquamarine AQ10-DST-HD is a best in class, ultra-high chroma (UHC) ink with a very stable shelf life and suitable for printing onto uncoated as well as coated papers.

NUtec managing director, Jamie Lowndes notes, "This product's unique chemistry has resulted in a much higher density ink with a lower liquid deposit requirement thus eliminating the incidence of mottling. When correctly profiled with the right ink limits applied, our customers can achieve a 30% to 40% ink saving resulting in very cost-effective yields. "
