OVERVIEW

Amethyst A50-HYB is a premium quality Hybrid UV ink designed for a wide range of rigid and roll-to-roll applications. The Amethyst A50-HYB is a wide format ink that cures with LED as well as Mercury Vapour UV lamps.

The A50-HYB is a hybrid ink that bridges the gap between rigid and roll-to-roll inks, providing the convenience of both in a single product.

This formulation is designed for compatibility across a broad range of print head types and features a superior colour gamut for bright, vivid images.

Provided the inks are used in regular applications, using suitable substrates, the printed images will last for up to 24 months.
