CMF

FEATURES

- Optimised for UV-curable inks

USED FOR:

- Storage fluid
- Capping purposes
- New print head preparation fluid before loading ink

OVERVIEW

NUtec Care and Maintenance Fluid (CMF) has been optimised for its expanding range of UV-curable inks.

CMF is more suitable across a broader range of competitor inks when converting to NUtec UV range of inks and fully compatible with NUtec's latest UV-curable inks.

CMF is the recommended preparation fluid to use when doing conversions from competitors to NUtec UV ink, as it is a more universal solution.

This cleaning solution has a very slow evaporation rate that is good for a number of uses while shipping and transport are easier because of less onerous regulatory requirements.

PACKAGING CONFIGURATIONS	1L and 3L bottles
SHELF LIFE	18 months
SHIPPING AND STORAGE INFORMATION	Storage & transit temperatures: +5°C to +35°C Store in a cool, dry area, not directly on the floor and away from direct sunlight
